AIRI lab | AI Design Tools Built by Architects, for Architects

Streamline architecture, interior, landscape, and urban design with AI tools for image generation, refinement, image-to-video creation, and smart design assistants.

AI tools built by architects, for architects
Streamline your workflow with powerful AI-powered image generation, design refinement, and creative exploration.Try AIRI Tools

Design Smarter, Render Faster
AI tools built to accelerate your workflow, from concept to refined rendering

AI Features
Smart Design Assistant
Engage in natural dialogue with an AI agent that understands your design needs, extracts key concepts and styles, and offers tailored creative suggestions instantly.**Try AIRI Tools**

- Smart Design Assistant
- AI-Powered Image Creation
- From Still to Motion

Solutions by Industry

For Architects
From massing studies to final renders, AIRI accelerates every phase of architectural design. Generate visual concepts in seconds, explore variations with ease, and focus your time on spatial logic and narrative, not rendering grunt work.

Interior Designers
Transform moodboards into mockups and concepts into photoreal visuals, all while preserving your design language. AIRI helps interior designers craft cohesive spatial stories with speed and style, from texture to tone.

Landscape Designers
Design green spaces that feel alive. AIRI enables fast iteration across large sites, helping you visualize ecosystems, topography, and site relationships with clarity, from early sketches to immersive scenes.

Urban Planning Designers
Translate zoning, density, and policy into visual stories that engage stakeholders. AIRI supports urban designers with rapid prototyping, contextual visuals, and scenario exploration, so good ideas gain traction faster.

Rendering Tools
Render with AIRI's Powerful Rendering tools

- Inspire
- Render
- Inpaint
- Insert Object
- Upscale
- Extend
- Atmosphere Swift

Enterprise Features
Enterprise-grade security and an LLM-agnostic architecture prioritize your data protection privacy while providing superior quality marketing outputs.

Secure
Your data is safe with us
Industry-leading encryption and access controls ensure intellectual property and design concepts remain fully protected within the organization.

Copyright
Full ownership, zero restrictions
Unlimited commercial rights with no additional licensing fees or third-party claims, design freely with complete peace of mind.

Team synergy
Collaborate seamlessly across your team
Real-time collaboration via shared asset libraries and centralized design templates enables teams to work without silos or duplicated effort.

Customized model
Tailored AI models for your workflow

AI model customization for both pre-production ideation and post-production refinement, tailored to match unique aesthetic and technical criteria.

Support
Dedicated and expert assistance
Hands-on training, onboarding, workflow consulting, and continuous technical support empower teams to rapidly maximize productivity.

OEM
Flexible deployment options
From cloud-based SaaS to on-premises installations, can be tailored to fit IT infrastructure, security policies, and operational preferences, enabling seamless integration.

Access
Create anywhere, anytime
No downloads needed — use AIRI Lab seamlessly across devices, right from your browser.
